---

## PROFILE SUMMARY

Aspiring Business and Data Analyst with experience in data analysis, dashboard creation, and business reporting using Power BI, Tableau, Excel, and Python. Skilled in data visualization, performance analysis, and transforming data into actionable business insights. Experienced in managing and analyzing business data to support data-driven decision-making.

---

## PROFESSIONAL EXPERIENCE

---

*PhillipCapital (India) Pvt. Ltd. | Business Development Intern | Oct 2025 – Dec 2025*

---

- Analyzed 850+ investor records using Excel
  - Maintained segmented databases
  - Tracked outreach performance metrics
  - Supported data-driven campaign decisions
- 

*Beyond Meds Foundation (NGO) | Marketing Head | December 2021 - March 2022*

---

- Led and managed a team of marketing interns, overseeing campaign execution and content strategy
  - Analyzed Meta Ads performance metrics (reach, engagement, CTR) to optimize targeting and campaign effectiveness
  - Improved digital engagement and visibility through data-driven marketing strategies
- 

## EDUCATIONAL BACKGROUND

---

PGDM (Pursuing) – Athena School of Management  
BMS – University of Mumbai, Thane Sub Campus  
Class XII – Lodha World School  
Class X – Pawar Public School

---

## PROJECTS

---

Project 1- Retail Sales Performance Dashboard | Power BI

---

- Built an interactive Power BI dashboard to evaluate sales performance, profit distribution, and category-level insights using retail data.
  - Analyzed multi-dimensional data (region, category, time) to uncover trends and performance gaps.
  - Created dynamic visual reports with filters (slicers) to enable user-driven analysis.
  - Translated data findings into business insights and strategic recommendations for improving revenue and operational efficiency.
-

---

#### Project 2- Impact of Emotional Storytelling on Audience Attachment | Excel

---

- Developed an Excel dashboard analysing 5000+ responses to study the relationship between storytelling quality and audience attachment.
- Applied data visualization techniques (scatter plots, pivot charts, KPIs) to identify trends across age, gender, and viewing behaviour.
- Connected data insights to real-world trends (e.g., film engagement), demonstrating how storytelling drives audience retention and repeat consumption.

---

#### Project 3 - Credit Card Transaction & Fraud Analysis Dashboard (Python, Pandas, Tableau)

---

- Conducted exploratory data analysis on credit card transaction data using Python and Tableau.
- Built an interactive dashboard to analyse fraud patterns, spending trends, transaction methods, and geographic transaction insights.
- Performed data cleaning, visualization, and grouped analysis using Pandas, Matplotlib, and Seaborn.

---

#### Project 4 - Video Game Sales Analysis Dashboard | Tableau

---

- Developed an interactive Tableau dashboard using global video game sales data to analyse genre-wise performance, platform trends, and regional sales distribution.
- Created visualizations including sales trend analysis, platform vs genre comparison, and regional sales comparison charts.
- Applied calculated fields, filters, and KPI-based analysis to identify high-performing game categories and market trends.
- Used data storytelling techniques to present insights on consumer preferences and sales performance across regions.

---

#### Project 5 – Superstore Sales & Profit Analysis Dashboard | Tableau

---

- Built a Tableau dashboard using Superstore retail data to analyse sales, profit trends, customer segments, and regional performance.
- Designed interactive visualizations including category-wise sales analysis, monthly sales trends, profit segmentation, and map-based regional insights.
- Utilized filters, dual-axis charts, and dashboard actions to enable dynamic business analysis and reporting.
- Identified key business insights related to profitability, sales growth, and regional performance patterns.
